Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Analysis of Water, Vol. 1: For Household and Municipal Purposes This little book, the first of a series dealing in an elementary.manner with the methods for the examination of water and food, has been prepared in order to place in the hands of our students directions which are believed to present in a more satisfactory manner the special practices and apparatus in use in the Chemical Laboratories of Cornell University, than can be done by the use of existing manuals, and at the same time provide more thorough training in manipulation, in the preparation of reagents and in the standardization of solutions for volumetric analysis. The subject matter is devoted to laboratory methods mainly, and is intended to supplement the lecture courses on Sanitary Chemistry in which the interpretation of results, relative value of different methods, the taking, transportation and preparation of samples is discussed at length. In the main, the official methods of the Laboratory Section of the American Public Health Association have been followed, but the authors have not hesitated to modify these methods where, in their judgment and experience such changes seemed desirable either from a pedagogical or practical viewpoint. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
