\*\*\*\*\*.1. The aim of this book is to help you to get a feel of a Java classroom environment. I was involved in teaching since 2005. I have taken classes in both engineering and non-engineering colleges. And fortunately most of my teaching involvement was based on Java and its advanced topics. That is the true motivation to introduce a book like this. 2. This book will not discuss how to write an if-else statement or a simple while loop etc. Your teacher expects that before attending the class, you have done your basic homework. Here your teacher will focus on the basic object oriented concepts that we can implement in Java. 3. With this book you will have a feel that you are learning Java in a classroom environment-where your teacher will discuss about some problems/topics, ask you questions and give you assignments. You will be encouraged to do those simple assignments before entering into a new topic. If you are dedicated to this subject and do those assignments, you will surely develop the confidence on...
